

Children's Privacy Policy

Updated: [1/19/2015](#)

Stasher is committed to protecting the privacy of children who use our site and application. This Children's Online Privacy Policy explains our information collection, disclosure, and parental consent practices with respect to information provided by children under the age of 13 ("child" or "children"), and uses terms that are defined in our general Privacy Policy. This policy is in accordance with the U.S. Children's Online Privacy Protection Act ("COPPA"). For more information about COPPA and general tips about protecting children's online privacy, please visit [OnGuard Online](#).

1. The Information We Collect From Children, How We Use It, and How and When We Communicate With Parents

Stasher offers to its users a site and application, which are targeted at users of all ages and their families, including children. Our site and application may collect information from children. Below we summarize potential instances of collection and outline how and when we will provide parental notice and/or seek parental consent. In any instance that we collect personal information from a child, we will retain that information only so long as reasonably necessary to fulfill the activity desired or allow the child to continue to participate in the activity, and ensure the security of our users and our services, or as required by law. In the event we discover we have collected information from a child in a manner inconsistent with COPPA's requirements, we will either delete the information or immediately seek the parent's consent for that collection.

Registration

Children can, in many cases, register with our site and application to view and engage in the content we provide, among other things. During the registration process, we may ask the child to provide certain information for notification and security purposes, including a parent or guardian's email address, the child's first name and gender, the child's account username, and password. We also may ask for birth dates from children to validate their ages. We strongly advise children never to provide any personal information in their usernames. Please note that children can choose whether to share their information with us, but certain features cannot function without it. As a result, children may not be able to access certain features if required information has not been provided. We will not require a child to provide more information than is reasonably necessary in order to participate in an online activity.

About the collection of parent email address: Consistent with the requirements of COPPA, on any child-targeted site or application, or in any instance where we ask for age and determine the user is age 12 or under, we will ask for a parent or guardian email address before we collect any personal information from the child other than a username. If you believe your child is participating in an activity that collects personal information and you or another parent/guardian have NOT received an email providing notice or seeking your consent, please feel free to contact us at bianca@stasherapp.com.

Content Generated by a Child

Certain activities on our site and application allow children to create or manipulate content and save it with Stasher. Some of these activities do not require children to provide any personal information and therefore may not result in notice to the parent or require parental consent. If an activity potentially allows a child to insert personal information in their created content, we will either pre-screen the submission to delete any personal information, or we will seek verifiable parental consent by email for the collection. Examples of created content that may include personal information are stories or other open-text fields that allow text or free-hand entry of information. If, in addition to collecting content that includes personal information, Stasher also plans to post the content publicly or share it with a third party for the third party's own use, we will obtain a higher level of parental consent.

About Verifiable Parental Consent:

Email Consent. In the event Stasher wishes to collect personal information from a child, COPPA requires that we first seek a parent or guardian's consent by email. In the email we will explain what information we are collecting, how we plan to use it, how the parent can provide consent, and how the parent can revoke consent. If we do not receive parental consent within a reasonable time, we will delete the parent contact information and any other information collected from the child in connection with that activity.

High-Level Consent. In the event Stasher collects personal information from a child that will be posted publicly, we will seek a higher level of consent than email consent. Such "high-level" methods of consent include but are not limited to asking for a credit card or other payment method for verification (with a nominal charge involved) or requiring a signed consent form by mail, email attachment, or fax.

Teacher consent in lieu of a parent. With regard to school-based activities, COPPA allows teachers and school administrators to act in the stead of parents to provide consent for the collection of personal information from children. Schools should always notify parents about these activities. For more information on parental rights with respect to a child's educational record under the Family Educational Rights and Privacy Act (FERPA), please visit the [FERPA site](#).

Email Contact with a Child

On occasion, in order to respond to a question or request from a child, Stasher may need to ask for the child's online contact information, such as an email address. Stasher will delete this information immediately after responding to the question or request.

In connection with certain activities or services, we may collect a child's online contact information, such as an email address, in order to communicate with the child more than once. In such instances we will retain the child's online contact information to honor the request and for no other purpose such as marketing. One example would be a newsletter that provides occasional

updates about certain content related to our site or application. Whenever we collect a child's online contact information for ongoing communications, we will simultaneously require a parent email address in order to notify the parent about the collection and use of the child's information, as well as to provide the parent an opportunity to prevent further contact with the child. On some occasions a child may be engaged in more than one ongoing communication, and a parent may be required to "opt-out" of each communication individually.

Push Notifications

Push notifications are notifications on mobile and other devices that are typically associated with downloaded applications, and which can communicate to the device holder even when the application is not in use. We will require a child to provide a parent email address before the child can receive push notifications from our child-directed applications that collect a device identifier. We will then provide the parent with notice of our contact with the child and will provide the parent the opportunity to prevent further notifications. Finally, we will not associate the device identifier with other personal information without contacting the parent to get consent.

Geolocation Data

If a child-directed Stasher site or application collects geolocation information that is specific enough to equate to the collection of a street address, we will first seek parental consent via email.

Persistent Identifiers

When children interact with us, certain information may automatically be collected, both to make our sites and applications more interesting and useful to children and for various purposes related to our business. Examples include the type of computer operating system, the child's IP address or mobile device identifier, the web browser, the frequency with which the child visits various parts of our site or application, and information regarding the online or mobile service provider. This information is collected using technologies such as cookies, flash cookies, web beacons, and other unique identifiers. This information may be collected by Stasher or by a third party. This data is principally used for internal purposes only, in order to:

- provide children with access to features and activities on our site and application
- customize content and improve our site and application
- conduct research and analysis to address the performance of our site and application
- generate anonymous reporting for use by Stasher

In the event we collect (or allow others to collect) such information from children on our site and application for other purposes, we will notify parents and obtain consent prior to such collection.

Please contact us at the mailing address or email below with questions about the operators' privacy policies and collection and use practices:

2. When Information Collected From Children Is Available To Others

In addition to those rare instances where a child's personal information is posted publicly (after receiving high-level parental consent), we also may share or disclose personal information collected from children in a limited number of instances, including the following:

- We may share information with our service providers if necessary for them to perform a business, professional, or technology support function for us.
- We may disclose personal information if permitted or required by law, for example, in response to a court order or a subpoena. To the extent permitted by applicable law, we also may disclose personal information collected from children (i) in response to a law enforcement or public agency's (including schools or children services) request; (ii) if we believe disclosure may prevent the instigation of a crime, facilitate an investigation related to public safety or protect the safety of a child using our site or application; (iii) to protect the security or integrity of our site, application, and other technology, as well as the technology of our service providers; or (iv) enable us to take precautions against liability.

3. Parental Choices and Controls

At any time, parents can refuse to permit us to collect further personal information from their children in association with a particular account, and can request that we delete from our records the personal information we have collected in connection with that account. Please keep in mind that a request to delete records may lead to a termination of an account, membership, or other service.

Where a child has registered for a Stasher account, we use two methods to allow parents to access, change, or delete the personally identifiable information that we have collected from their children:

1. Parents can request access to and delete their child's personal information by logging on to the child's account through the Stasher application. Parents will need their child's username and password.
2. Parents can contact Stasher to request access to, change, or delete their child's personal information by sending an email to us at bianca@stasherapp.com.
